

QUALY

2022

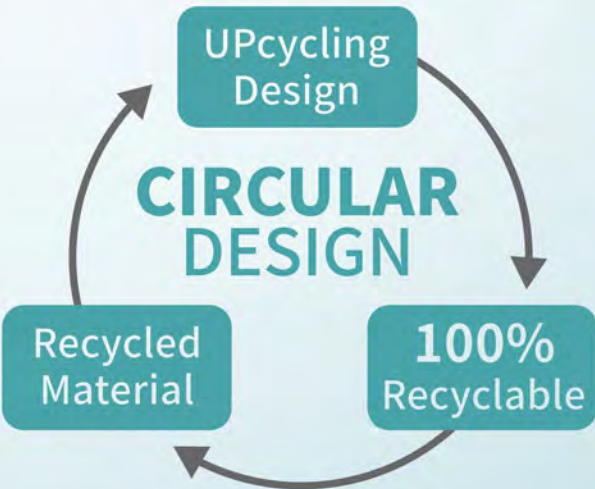

ENVIRONMENTAL ISSUES - A CONSTANT PRIORITY FOR QUALY

We believe a circular economy is the best solution. As such, we pay attention to the materials we use, it is thus a must to be eco-friendly and 100% recyclable and we initiated to use recycled material in our products.

In 2018, we started a collaboration with Ichitan, the largest tea beverage company in Thailand (www.ichitangroup.com), in their Zero Waste Factory Project to convert large volumes of rejected bottles into useful and functional products, helping to reduce substantial waste plastic-an endeavour that has been very well-received by the public.

Qualy shall continue to design products to bring happiness to its customers while playing its part to build an environmentally sustainable society. In doing so, we seek to live up to our philosophy and our slogan : **"Living With Smiles."**

CIRCULAR MATERIALS

- ✓ Recycled material
- ✓ BPA Free
- ✓ 100% Recyclable

GREEN ABS | NATURAL RUBBER

Renewable Resource

Help rubber tree farmer

Replace 10% of the synthetic rubber in ABS material.

Non-food chain material

White elephant figurine

✓ Biobased

✓ BPA Free

✓ Food Safe

✓ 100% Recyclable

GREEN ABS | + WOOD POWDER

Renewable Resource

Help rubber tree farmer

Replace 10% of the synthetic rubber in ABS material.

Wood powder

Brown pumpkin-shaped container

✓ Biobased

✓ BPA Free

✓ Food Safe

✓ 100% Recyclable

"Won" is a project created by a small group of staffs of TPBI Public Company Limited who interested in resolving plastic waste problems in a creative way by using "Circular Economy" concept. Focus on sharing their knowledge regarding plastic information, waste sorting and recycle process of plastic waste.

Won project has been started with their company's staffs and now expanding Won project to other communities universities and organizations.

"Won" is the project that welcomes all used, clean plastic bags and plastic film to be recycled, reproduced, reused with the circular economy concept, therefore, the plastic trashes that will be disposed, will be reduced.

Everyone can be part of the circular economy movement by simply separate waste for recycling, let it transforms to be new material, or support products made from recycled material.

Qualy is happy to be part to recover our environment and help income distribution to the community by joining the "Net free seas" project by EJF

Qualy, among others buyer, purchases the discarded fishing nets from local fishing villages to use as a raw material to create every day, creative products, home decorative items, and the product that helps reduce the spreading of the COVID-19, following the "Circular Design", but most of all, we aim to reduce the plastic waste and new natural resource consumption.

Furthermore, we also continue developing products from other recycled materials, in order to be responsible for our society, and our environment sustainably.

Food waste that ends up in landfills produces a large amount of **methane** - **more than 80 times** the warming power of CO₂

Stop food waste
